

Dear Family of Teresa Belluco,

This letter is to acknowledge Teresa's enrollment in the Synovial Sarcoma Registry and Biospecimen Repository and the donation of her tumor. We have received her medical records and tumor specimen from MD Anderson.

We will use this information to help researchers better understand this rare disease and develop new, effective treatments. Through this registry and biorepository, we also intend to bring more awareness of synovial sarcoma to researchers and the medical community.

We thank you for this contribution.

Sincerely,

Ted Laetsch and the CHOP Precision Medicine Team
